Pizza Place Sales

Overview of the Project: -

4 data sets names: - 1. order_details
2. orders
3. pizza_types
4. pizzas

Recommended Analysis

Performed by SQL Tool

- How many customers do we have each day? Are there any peak hours. ✦ There are two peak hours: from 12 to 1 and from 5 to 6

✦ We see 60 customers a day on average.

```
1   #Q1. How many customers do we have each day? Are there any peak hours?
2   # How many customers do we have each day ?
3   SELECT * FROM orders;
4
5   SELECT Round(AVG(counts),0) as numbers_of_customers_each_day
6   FROM (
7   SELECT date, COUNT(DISTINCT order_id) AS counts
8   FROM orders
9   GROUP BY date
10  )subquery;
11
12  # We see 60 customers a day on average
13
```

23	28

- How many pizzas are typically in order? Do we have any bestsellers? ✦ Average no. of pizza in an order is 2.

```sql
#Q2. How many pizzas are typically in order? Do we have any bestsellers?
#Average No. of Pizza in an Order
SELECT round(Avg(order_count),0) AS average_order_count
FROM (
    SELECT order_id, COUNT(order_id) AS order_count
    FROM order_details
    GROUP BY order_id
) subquery;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

average_order_count
2

✦ The best seller pizza is big_meat_s

```
32
33      #Do we have any bestsellers?
34
35 •    SELECT pizza_id, Count(order_id) AS total_sold
36      FROM order_details
